V9 / ORIGINAL BOT & ORIGINAL PRESET

Eight tests. One comparison.

1 Jan 2022 - 30 Sep 2026 | EUR and USD | Historical simulations

All eight reports show **100% real ticks**. This describes the historical data, not a success rate or future performance.

Euro accounts

Starting capital	Net profit	Max. relative equity drawdown
EUR 10,000.00	EUR 54,992.53	11.51%
EUR 80,000.00	EUR 442,311.79	11.56%
EUR 100,000.00	EUR 552,996.27	11.56%
EUR 150,000.00	EUR 829,456.09	11.56%

US dollar accounts

Starting capital	Net profit	Max. relative equity drawdown
USD 10,000.00	USD 69,232.89	12.25%
USD 80,000.00	USD 554,810.91	12.33%
USD 100,000.00	USD 693,460.35	12.33%
USD 150,000.00	USD 1,040,608.72	12.33%

Shared test conditions

Eight independent runs: 10,000, 80,000, 100,000 and 150,000 in EUR and USD. Same dates, original bot and original preset; only starting capital and currency change. Broker data: FTMO-Server. Leverage 1:100; execution delay 100 ms. Broker-specific costs and execution assumptions limit transferability.

Historical simulations, not live results. Each run used the stated capital and currency. Past results do not guarantee future profits. You can lose your entire trading capital.

BACKTEST - EUR

EUR 10,000

1 Jan 2022 - 30 Sep 2026 | Historical simulation

Unchanged original bot and 81 original preset values checked for each run. Independent simulation.
